INSTALLATION TIPS

FOR A COMPLETE SET OF INSTALLATION INSTRUCTIONS WITH ILLUSTRATIONS, PLEASE DOWNLOAD THEM FROM OUR WEBSITE. (www.aerographics.com)

- Vinyl striping is usually too large to handle by yourself. Ask a friend to help and take your time.
- The adhesive on the vinyl becomes more aggressive with temperature. Try to avoid direct sunlight when installing the stripe to allow for more forgiveness.
- Your stripe will be shipped to you as one piece with all colors appropriately spaced. Measure and tape your stripe into place with the backing still on. Once you have the large piece properly placed, you can cut between the colors making sure to secure the cut pieces to minimize the amount of material being applied at one time.
- Over long lengths, the stripe can stray during application. Use a grease pen or masking tape to make reference marks every foot for varification that are still on course. If the application starts to wander, gently pull the material in the appropriate direction while applying.
- It is best to avoid them, but bubbles are not the end of the world. through temperature and barometric changes, the small bubbles will recede. Any large bubbles can be removed by popping them with a pin and pressing down the material. Cleaning up around rivots can be handled in the same manor.

StripeRite

AT LAST

A QUICK & EASY WAY TO StripeRite!!!
WITH OUR CUSTOMIZED MASK (STENCIL) GET
SHARP, EVEN, PERFECT STRIPES EVERYTIME!!

No need for a lazer or spending valuable time
laying each stripe individually.

StripeRite is a stencil material
30 feet long with 1/4 inch stripes already cut.
You just stick the material on the surface to be striped
and pull out as many 1/4 inch strips as you need.

Example: If you want a 1" stripe with a 1/2" space and then another 1/2" stripe, you just pull 4 stripes out, leave 2, and then pull 2 more out.

StripeRite comes in 6 inch x 30 foot rolls
\$50.00 each

If you're a painter who wants the lazer look,
CALL & ORDER StripeRite NOW.
