## High Performance Vinyl:

\*Per Character

All registration numbers are provided in 3M High Performance vinyl for longevity and durability. Vinyl registration numbers are a quick way to mark your aircraft with a professional painted look. Refer to color swatches in back cover for color choices.

## Paint Mask:

We can help you cut the prep time on your next paint job with our paint mask registration numbers. All cut lines are rubbed with charcoal and no material is pulled (unless requested). This allows you to pull the positive or negative of the number at the time of painting. All outline and shadow options are still available in paint mask. We primarily use Avery masking material but Gerber is available upon request. If you are unsure if the material will work for you, please call and request a test sample.

---

## Temporary Numbers:

This is a quick and easy way to display your registration number. Our Temporary numbers are printed on an opaque white background. This allows you to cover existing numbers and stripes for maximum visibility.
